<b>NUMS 2021 PREP STRATEGY — Pakistan's #1 Free NUMS Resource</b>	
<b>Biology (55 Qs)</b>	37%+ of paper. Cell bio, genetics, physiology, ecology. Every Bio mark = closer to seat.
<b>Physics (40 Qs)</b>	Mechanics, waves, electromagnetism, nuclear physics. Numericals = easy marks.
<b>Chemistry (40 Qs)</b>	Organic chemistry reactions = biggest scoring zone. Master mechanisms.
<b>English (17 Qs)</b>	Easiest 17 marks. 15 min daily grammar practice = near perfect score.
<b>NUMS Book</b>	27%+ of questions from NUMS Entry Test Book by MbBs.Com.Pk — order now.
<b>MDCAT Book</b>	Also order MDCAT Past Papers Book by MbBs.Com.Pk — 12-18% extra overlap.
<b>Attempt Order</b>	English (10 min) → Biology → Chemistry → Physics. Never leave blank.

## SECTION 1 — PHYSICS (Q.1-Q.40)

**Q1** In isochoric process:

- A Pressure is kept constant                       B Exchange of heat is zero  
 C Volume is kept constant                       D Temperature is kept constant

**Q2** If 42J heat is transferred to system during expansion and work done is 32J, change in internal energy is:

- A 74 J     B 10 J  
 C 116 J     D 106 J

**Q3** The 1st law of thermodynamics is generalization of law of conservation of:

- A Mass     B Charge  
 C Energy     D Momentum

**Q4**  $RC = \text{Resistance} \times \text{Capacitance}$  is known as:

- A Electrostatic constant                       B Time constant  
 C Dielectric constant                       D Proportionality constant

**Q5** In parallel combination of two capacitors, equivalent capacitance equals:

- A  $C_1 + C_2$                                        B  $1/C_1 + 1/C_2$   
 C  $C_1 C_2 / (C_1 + C_2)$                        D  $2C_1 C_2 / (C_1 + C_2)$

**Q6** The S.I unit of capacitance is:

- A Coulomb                                       B Volt  
 C Farad     D Ampere

**Q7** 1 kWh =

- A  $0.36 \times 10^6$  J                                   B  $36 \times 10^5$  J  
 C  $3.6 \times 10^6$  J                                   D  $0.036 \times 10^5$  J

**Q8** Volt × Ampere is the unit of:

- A Current
- B Volt
- C Resistance
- D Power

**Q9** The time rate of change of velocity is called:

- A Force
- B Acceleration
- C Power
- D Energy

**Q10** In projectile motion, range will be maximum at angle:

- A 30 degrees
- B 45 degrees
- C 60 degrees
- D 90 degrees

**MDCATGUIDE.COM ANALYSIS | PHYSICS**

*Based on 5-Year Topic Overlap Study*

**27% of NUMS Physics MCQs in last 5 years appeared directly from NUMS Entry Test Book by MbBs.Com.Pk**

**27%**

27% NUMS Entry Test Book by MbBs.Com.Pk

12% All Other Combined Resources

11% Waves & Thermodynamics alone:  
11% of Physics

★ Students who practiced this book scored 8-10 marks higher in Physics — mdcatsguide.com analysis

**ORDER NOW → [mbbs.com.pk/product/nums-book/](https://mbbs.com.pk/product/nums-book/)**

**+92 316 4047600**

**Q11** Which is NOT TRUE about momentum?

- A Momentum is quantity of motion
- B Unit of momentum is N.s
- C Momentum is NOT a vector quantity
- D Momentum is product of mass and velocity

---

**Q12 In perfect elastic collision:**

- A Only momentum conserved
- B Only total energy conserved
- C Only kinetic energy conserved
- D Momentum, KE and total energy all conserved

---

**Q13 Slope of a displacement-time graph is:**

- A Velocity
- B Displacement
- C Acceleration
- D Distance

---

**Q14 Two stones 10kg and 50kg fall from 100m cliff. Which has greater velocity at bottom?**

- A 10 Kg
- B 50 Kg
- C Both have same velocity
- D Cannot be calculated

---

**Q15 Work done by gravity on 10N stone falling 250m:**

- A 250 J
- B 26 J
- C 2,500 J
- D 25,000 J

---

**Q16 Speed halved — kinetic energy decreases by factor:**

- A 1/2
- B 1/4
- C 1/8
- D 1/6

---

**Q17 Earth contracts to half size — gravitational PE becomes:**

- A Double
- B One-half
- C Same
- D Four times

---

**Q18 Product of force and velocity is:**

- A Kinetic Energy
- B Potential Energy
- C Power
- D Work done

**Q19** One degree is equal to:

A 0.1 radian

B 0.15 radian

C 0.0175 radian

D 0.275 radian

**Q20** Object on circular path  $r=1\text{m}$  covers  $2\text{m}$  arc. Angular displacement:

A  $1/2$  rad

B 2 rad

C 3 rad

D  $2/3$  rad

**Q21** Speed and radius both doubled — centripetal force becomes:

A Same

B Double

C 4 times

D 8 times

**Q22** Relation between angular and linear velocity:

A  $a = r\omega$

B  $v = r\omega$

C  $\omega = v/r^2$

D  $v = \omega/r$

**MDCATGUIDE.COM ANALYSIS | PHYSICS —  
Mechanics & Circular Motion**

*Based on 5-Year Topic Overlap Study*

**Mechanics (projectile, momentum, circular motion)  
accounts for 38% of all NUMS Physics questions**

**38%**

38% NUMS Entry Test Book  
by MbBs.Com.Pk

18% All Other Combined  
Resources

**ORDER NOW → [mbbs.com.pk/product/nums-book/](https://mbbs.com.pk/product/nums-book/)**

**+92 316 4047600**

**Q23** 100 waves per second, wavelength  $1\text{cm}$  — wave speed:

A  $1\text{ ms}^{-1}$

B  $2\text{ ms}^{-1}$

C  $3\text{ ms}^{-1}$

D  $4\text{ ms}^{-1}$

**Q32** Wire radius halved — resistance becomes:

- A 4R  B R  
 C 6R  D 16R

**Q33** Charged particle enters magnetic field parallel — it will:

- A Deflect towards North  B Deflect towards South  
 C Move straight  D Move in circular path

**Q34** Magnetic flux is maximum when angle between field and area vector is:

- A  $0^\circ$   B  $90^\circ$   
 C  $180^\circ$   D  $45^\circ$

**Q35** Pakistan domestic electricity supply has frequency:

- A 70 Hz  B 50 Hz  
 C 100 Hz  D 30 Hz

**Q36** Device that increases or decreases EMF is called:

- A AC generator  B Motor  
 C Transformer  D DC generator

**Q37** Induced current opposes the cause that produces it. This is:

- A Ampere's Law  B Faraday's Law  
 C Lenz's Law  D Joule's Law

**Q38** The half-life of a radioactive substance is 20 minutes. After 1 hour, fraction remaining is:

- A  $1/2$   B  $1/4$   
 C  $1/8$   D  $1/16$

**Q39** Which of following has maximum penetrating power?

- A Alpha particles  B Beta particles  
 C Gamma rays  D X-rays

---

**Q40** The escape velocity from earth's surface is approximately:

**A** 7.9 km/s

**B** 11.2 km/s

**C** 3.0 km/s

**D** 9.8 km/s

## SECTION 2 — BIOLOGY (Q.41-Q.95)

**Q41** If fertilization occurs, young embryo is implanted into:

- |                                       |  |
|---------------------------------------|--|
| <input type="checkbox"/> A Epimetrium | <input type="checkbox"/> B Perimetrium |
| <input type="checkbox"/> C Myometrium | <input type="checkbox"/> D Endometrium |

**Q42** Sperms are produced in:

- |   |   |
|---|---|
| <input type="checkbox"/> A Vas deferens | <input type="checkbox"/> B Collecting duct      |
| <input type="checkbox"/> C Epididymis   | <input type="checkbox"/> D Seminiferous tubules |

**Q43** Gonadotropins are released by which gland?

- |                                      |   |
|--------------------------------------|---|
| <input type="checkbox"/> A Ovaries   | <input type="checkbox"/> B Hypothalamus |
| <input type="checkbox"/> C Pituitary | <input type="checkbox"/> D Testes       |

**Q44** Found at ends of long bones, nose, larynx and trachea:

- |  |  |
|--|--|
| <input type="checkbox"/> A Elastic cartilage | <input type="checkbox"/> B Fibrous cartilage |
| <input type="checkbox"/> C Perichondrium     | <input type="checkbox"/> D Hyaline cartilage |

**Q45** Muscle with spontaneous contraction, many nuclei and no control over contraction:

- |  |  |
|--|--|
| <input type="checkbox"/> A Smooth muscle   | <input type="checkbox"/> B Cardiac muscle  |
| <input type="checkbox"/> C Skeletal muscle | <input type="checkbox"/> D Visceral muscle |

**Q46** Ball and Socket joint is present at:

- |                                     |                                  |
|-------------------------------------|----------------------------------|
| <input type="checkbox"/> A Shoulder | <input type="checkbox"/> B Wrist |
| <input type="checkbox"/> C Elbow    | <input type="checkbox"/> D Knee  |

**Q47** Na<sup>+</sup> ions are nearly \_\_\_\_\_ times greater outside cell than inside:

- |                               |                               |
|-------------------------------|-------------------------------|
| <input type="checkbox"/> A 10 | <input type="checkbox"/> B 30 |
| <input type="checkbox"/> C 2  | <input type="checkbox"/> D 3  |

**Q48** Which hormone induces labour pains?

- |   |                                     |
|---|-------------------------------------|
| <input type="checkbox"/> A Estrogen     | <input type="checkbox"/> B Oxytocin |
| <input type="checkbox"/> C Progesterone | <input type="checkbox"/> D LH       |

**Q49** Hormone secreted due to decreased water content of blood:

- A ADH
- B Oxytocin
- C Glucagon
- D Thyroxin

**Q50** Place of production of neurotransmitters:

- A Postsynaptic neuron
- B Presynaptic neuron
- C Synaptic cleft
- D Dendrite

**Q51** Endorphins are produced in:

- A Brain
- B Adrenal gland
- C Stomach
- D Thymus

**Q52** Hormone responsible for sperm production and male secondary sexual characteristics:

- A Estrogen
- B Progesterone
- C Testosterone
- D Thyroxin

**Q53** Leydig cells are responsible for:

- A Testosterone production
- B FSH production
- C Sperm production
- D Testosterone inhibition

**Q54** Estrogen secretion during oogenesis is stimulated by:

- A LH
- B Inhibin
- C FSH
- D Testosterone

**Q55** Pituitary hormones regulating menstrual cycle:

- A FSH and estrogen
- B LH and estrogen
- C FSH and LH
- D Estrogen and progesterone

**Q56** Trait transmitted from affected father to only his son:

- A Autosomal
- B X-linked
- C Y-linked
- D X-Y linked

**Q57** When both alleles of a gene pair are same, organism is:

- A Heterozygous
- B Genotype
- C Homozygous
- D Phenotype

**Q58** Similar in function but different in structure — organs called:

- A Analogous organs
- B Homologous organs
- C Convergent organs
- D Divergent organs

**Q59** NOT a mode of action of an antibody:

- A Neutralizing antigen
- B Precipitating antigen
- C Secretion of cytokines
- D Enhancing phagocytosis

**Q60** Pepsinogen is converted into active pepsin by:

- A Proteolytic enzyme
- B Dissolving in mucus
- C Hormonal action
- D Hydrochloric acid

**MDCATGUIDE.COM ANALYSIS | BIOLOGY**

**Q61** Which human body function is NOT controlled through negative feedback?

- A Body temperature
- B Glucagon production
- C Labor contraction
- D Parathyroid activity

---

**Q62 Grey matter of spinal cord does NOT contain:**

- A Cell bodies of sensory neurons       B Cell bodies of interneurons  
 C Axons of interneurons       D Cell bodies of motor neurons

---

**Q63 Maximum temperature in enzyme action — enzymes:**

- A Start to denature       B Start to re-nature  
 C Work best       D Are reactivated

---

**Q64 Feedback inhibition — enzyme inhibited by:**

- A Product being produced       B Normal regulatory mechanism  
 C Unaffected by product       D Inhibited irreversibly

---

**Q65 Chemical that regulates enzymatic activity:**

- A Activator       B Inhibitor  
 C Substrate       D Coenzyme

---

**Q66 Above optimum temperature, enzymatic activity decreases due to:**

- A Saturation       B Inhibition  
 C Denaturation       D Composition

---

**Q67 NOT part of Darwin's theory of natural selection:**

- A Organisms produce more offspring than environment supports  
 B Variation arises by gene mutation  
 C Only best adapted survive  
 D Individuals compete for resources

---

**Q68 Kiwi evolution, horse food, duck webbed feet — explained by:**

- A Lamarck       B Darwin  
 C Weismann       D De Vries

---

**Q69 NOT TRUE about interferons:**

- A Belong to cytokines       B Activate natural killer cells  
 C Activate immune cells       D Secrete interleukin

---

**Q70 Intrinsic factor from parietal cells helps in:**

- |   |  |
|---|--|
| <input type="checkbox"/> A Vitamin B12 absorption | <input type="checkbox"/> B Protein digestion |
| <input type="checkbox"/> C Carbohydrate breakdown | <input type="checkbox"/> D Bowel movement    |

---

**Q71 Major gastric juice production triggered by:**

- |  |  |
|--|--|
| <input type="checkbox"/> A Taste sensation         | <input type="checkbox"/> B Smell of food |
| <input type="checkbox"/> C Protein food in stomach | <input type="checkbox"/> D Sight of food |

---

**Q72 NOT a metabolic role of liver:**

- |   |   |
|---|---|
| <input type="checkbox"/> A Glycogenolysis | <input type="checkbox"/> B Gluconeogenesis          |
| <input type="checkbox"/> C Deamination    | <input type="checkbox"/> D Immunoglobulin synthesis |

---

**Q73 Enzyme NOT produced by pancreas:**

- |                                   |                                    |
|-----------------------------------|------------------------------------|
| <input type="checkbox"/> A Lipase | <input type="checkbox"/> B Trypsin |
| <input type="checkbox"/> C Pepsin | <input type="checkbox"/> D Amylase |

---

**Q74 Heart chamber from where aorta originates:**

- |   |  |
|---|--|
| <input type="checkbox"/> A Left ventricle | <input type="checkbox"/> B Right ventricle |
| <input type="checkbox"/> C Left atrium    | <input type="checkbox"/> D Right atrium    |

---

**Q75 Lymphatic system does NOT include:**

- |  |  |
|--|--|
| <input type="checkbox"/> A Lymphoid masses | <input type="checkbox"/> B Lymph vessels |
| <input type="checkbox"/> C Spleen          | <input type="checkbox"/> D Lungs         |

---

**Q76 Protein in walls of alveoli:**

- |                                      |  |
|--------------------------------------|--|
| <input type="checkbox"/> A Collagen  | <input type="checkbox"/> B Haemoglobin |
| <input type="checkbox"/> C Myoglobin | <input type="checkbox"/> D Myosin      |

---

**Q77 Natural bacterial flora beneficial because they:**

- |   |  |
|---|--|
| <input type="checkbox"/> A Interfere with pathogenic colonization | <input type="checkbox"/> B Develop resistance against antigens |
| <input type="checkbox"/> C Resist physical agents                 | <input type="checkbox"/> D Produce antibiotics                 |

**Q78 Bacteria resistance against heat provided by:**

- A Granules
- B Cysts
- C Spores
- D Plasmids

**Q79 Cells most important for immunity:**

- A Monocytes
- B Neutrophils
- C Lymphocytes
- D Thrombocytes

**Q80 Digestion of which food starts from oral cavity?**

- A Proteins
- B Fats
- C Carbohydrates
- D Vitamins

## SECTION 2 — BIOLOGY (continued)

**Q82 Pubic symphysis and intervertebral disc are examples of:**

- |   |  |
|---|--|
| <input type="checkbox"/> A Fibrous joints       | <input type="checkbox"/> B Synovial joints |
| <input type="checkbox"/> C Cartilaginous joints | <input type="checkbox"/> D Gliding joints  |

**Q83 Cartilage harder to heal than bone because it:**

- |  |   |
|--|---|
| <input type="checkbox"/> A Lacks vascular supply | <input type="checkbox"/> B Lacks mineral deposits |
| <input type="checkbox"/> C Has fewer cells       | <input type="checkbox"/> D Lacks protein          |

**Q84 Feature absent from cardiac muscles:**

- |   |   |
|---|---|
| <input type="checkbox"/> A Intercalated disc    | <input type="checkbox"/> B Multinucleate cells    |
| <input type="checkbox"/> C Light and dark bands | <input type="checkbox"/> D Contractile sarcomeres |

**Q85 Sarcoplasmic reticulum mainly responsible for:**

- |   |  |
|---|--|
| <input type="checkbox"/> A Calcium storage  | <input type="checkbox"/> B Protein synthesis   |
| <input type="checkbox"/> C Lipid metabolism | <input type="checkbox"/> D Storing cell wastes |

**Q86 Junction between two neurons:**

- |                                    |                                    |
|------------------------------------|------------------------------------|
| <input type="checkbox"/> A Impulse | <input type="checkbox"/> B Synapse |
| <input type="checkbox"/> C Axon    | <input type="checkbox"/> D Cleft   |

**Q87 Chemically a steroid hormone:**

- |                                      |                                     |
|--------------------------------------|-------------------------------------|
| <input type="checkbox"/> A ADH       | <input type="checkbox"/> B Thyroxin |
| <input type="checkbox"/> C Cortisone | <input type="checkbox"/> D Insulin  |

**Q88 Parathyroid underactivity causes drop in blood:**

- |                                      |                                      |
|--------------------------------------|--------------------------------------|
| <input type="checkbox"/> A $Mg^{2+}$ | <input type="checkbox"/> B $Na^{+}$  |
| <input type="checkbox"/> C $K^{+}$   | <input type="checkbox"/> D $Ca^{2+}$ |

**Q89 Protein establishing matrix of bone and cartilage:**

- |                                     |                                    |
|-------------------------------------|------------------------------------|
| <input type="checkbox"/> A Elastin  | <input type="checkbox"/> B Keratin |
| <input type="checkbox"/> C Collagen | <input type="checkbox"/> D Histone |

**Q90 Non-competitive inhibitors react at:**

- A Allosteric site
- B Active site
- C Passive site
- D Regulatory site

**Q91 Most enzymes work best at temperature:**

- A 30°C
- B 40°C
- C 50°C
- D 20°C

**Q92 Competitive inhibitors block substrate because they have:**

- A Similar shape to substrate
- B Different shape to substrate
- C Higher molecular weight
- D Stronger bonds

**Q93 When light falls on P-700, it is:**

- A Induces photolysis
- B Gains Hydrogen
- C Accepts electrons
- D Oxidised

**Q94 Products of light reaction used in dark reaction:**

- A ATP and NADP<sup>+</sup>
- B ADP and NADP<sup>+</sup>
- C ADP and NADPM
- D ATP and NADPH

**Q95 End products of light reactions of photosynthesis:**

- A ATP and NADPH
- B ATP and glucose
- C Glucose and NADP
- D ATP and water

**Q96 Smallest known bacteria belong to genus:**

- A Mycoplasma
- B Streptococcus
- C Escherichia
- D Bacillus

**Q97 Tonoplast is membrane separating:**

- A Vacuole and Nucleoplasm
- B Cytoplasm and Nucleoplasm
- C Vacuole and Stroma
- D Vacuole and Cytoplasm

**SECTION 3 — ENGLISH (Q.96-Q.112)**

**Q98** I \_\_\_\_\_ English for five years.

- A Study  B Am Studying  
 C Have been studying  D Studies

**Q99** The soup \_\_\_\_\_ good.

- A Taste  B Tastes  
 C Is tasting  D Has taste

**Q100** Unless we \_\_\_\_\_ now, we cannot be on time.

- A Start  B Will start  
 C Do not start  D Are starting

**Q101** Daud is better than \_\_\_\_\_ of the college.

- A All teachers  B Any teachers  
 C All other teachers  D Any teacher

**Q102** Abide \_\_\_\_\_ the traffic laws for smooth and safe flow of traffic.

- A On  B With  
 C By  D To

**Q103** He prefers death \_\_\_\_\_ dishonor.

- A Over  B On  
 C Upon  D To

**Q104** What does the word 'SURPLUS' mean?

- A In excess  B A mathematical term  
 C Within reach  D Salutation

**Q105** What does the word 'SPILL' mean?

- A Coil  B Deliver  
 C Spoil  D Spread

**QUICK FACT | ENGLISH — The Easiest 17 Marks in NUMS**

**15+**

mdcatguide.com analysis shows students who scored **15+ in English** secured NUMS seats even with slightly lower Biology scores.

Score in English  
Grammar, prepositions and sentence correction repeat every year. **15 minutes daily = full 17 marks.**

**Q106 What does the word 'CURIOUS' mean?**

- A Keen  B Careful  
 C Quest  D Cruel

**Q107 Pick the sentence with correct punctuation:**

- A He had one motto "serving humanity."  B He, had one motto, serving humanity.  
 C He had one motto; serving humanity.  D He had one motto: serving humanity.

**Q108 Pick the word with correct spelling:**

- A Collique  B Colleague  
 C Collegue  D Co-leageu

**Q109 Pick the word with correct spelling:**

- A Acquaintance  B Equatance  
 C Equantence  D Equentense

**Q110 Pick the word with correct spelling:**

- A Prayority  B Priarity  
 C Prioarily  D Priority

**Q111 Pick the sentence with correct punctuation:**

- A "He did his best that was all anyone could do".  
 B He did his best, that was all anyone could do.  
 C He did his best: that was all anyone could do.  
 D He did his best; that was all anyone could do.

**Q112** Pick the correct option:

- A How has the chair leg broken?       B How has the leg of the chair broken?  
 C How the leg of the chair has broken?       D How the chair's leg is broken?

**Q113** The teacher asked the students \_\_\_\_\_ they had completed their homework.

- A that       B whether  
 C if that       D whether or not that

**Q114** Neither the students nor the teacher \_\_\_\_\_ present today.

- A are       B were  
 C was       D have been

#### SECTION 4 — CHEMISTRY (Q.113-Q.152)

**Q115** Vapor pressure is independent of:

- A Temperature       B Intermolecular forces  
 C Density of liquid       D Surface area of liquid

**Q116** Boiling point of ether less than alcohols due to:

- A Functional group       B Intermolecular forces  
 C Nature of alkyl groups       D Isomerism

**Q117** Ice cubes unite when pressed due to:

- A Dipole-dipole       B Covalent attraction  
 C Van Der Waal's forces       D H-bonding

**Q118** NaCl crystal: each Na<sup>+</sup> surrounded by:

- A 6 Cl<sup>-</sup> and each Cl<sup>-</sup> by 6 Na<sup>+</sup>       B Face centred cubic only  
 C 3 Cl<sup>-</sup> and 3 Na<sup>+</sup>       D Intermolecular forces

**Q119** Greater lattice energy shown by:

- A NaCl       B NaBr  
 C NaI       D NaF

**Q120 Thermal conductivity of metals due to:**

- A Layered structure                       B Freely moving electrons  
 C Loosely held atoms                       D Vibrational movement

**Q121 200 atm pressure in Haber's process used for:**

- A Better yield                                   B Lower yield  
 C Lower rate                                     D Cost decrease

**Q122 Equilibrium attained earlier by using:**

- A Temperature                                 B Pressure  
 C Concentration                                D Catalyst

**Q123 Temperature raised 10K — reaction rate increases to:**

- A Double                                         B Three times  
 C Four times                                     D Five times

**Q124 Minimum energy for effective collisions:**

- A Activation energy                            B Lattice energy  
 C Bond energy                                  D Hydration energy

**Q125 Which is NOT a state function?**

- A Pressure (P)                                 B Work (W)  
 C Volume (V)                                  D Temperature (T)

**Q126  $Mg^{2+}(g) + O^{2-}(g) \rightarrow MgO(s)$  represents:**

- A Atomization                                 B Neutralization  
 C Lattice energy                                D Solution

**Q127 When nitric oxide reacts with ozone, order of reaction is:**

- A 2nd     B 3rd  
 C 1st      D Zero

**Q128** During electrolysis, reduction always occurs at:

- A Anode  B Cathode  
 C SHE  D Salt bridge

**Q129** Highest electronegativity of Fluorine due to:

- A Complete outer shell  B Forms negative ion  
 C Diatomic molecule  D Smaller size and higher nuclear charge

**+92 316 4047600**

**Q130** VSEPR theory explains:

- A Bond Energy  B Bond Length  
 C Shapes and Bond Energy  D Shapes

**Q131**  $sp^3$  hybridization is shown by:

- A  $BF_3$   B  $C_2H_4$   
 C  $BeCl_2$   D  $CH_4$

**Q132** Factor NOT affecting bond length:

- A Multiple bonds  B Nature of hybridization  
 C Difference in electronegativity  D Ionization energies of bonded atoms

**Q133 Malleable and ductile substance:**

- A Sodium chloride                       B Copper sulphate  
 C Mercury                                       D Aluminum

**Q134 Coordination number of Na in metallic BCC structure:**

- A 10     B 9  
 C 8     D 12

**Q135 Cracking method for better quality gasoline:**

- A Thermal                                       B Catalytic  
 C Steam                                          D Radiations

**Q136 Homocyclic organic compounds divided into:**

- A Alicyclic and Aromatic                       B Open and branched chain  
 C Aromatic and non-aromatic                       D Antiaromatic and antialicyclic

**Q137 Acetophenone formed from benzene by:**

- A Alkylation                                       B Acylation  
 C Halogenation                                       D Nitration

**Q138 Generic formula of cycloalkane is:**

- A  $C_nH_{2n+2}$                                        B  $C_nH_{2n}$   
 C  $C_nH_{2n-1}$                                        D  $C_nCH_{2n-2}$

**Q139 Test that differentiates alcohol from phenol:**

- A Lucas test                                       B Halogenation  
 C Nitration                                         D Iodoform test

**Q140 Order of reactivity of alcohol when C-O bond breaks:**

- A Tertiary > secondary > Primary                       B Secondary > primary > tertiary  
 C Primary > secondary > tertiary                       D Tertiary > primary > secondary

**Q141**  $C_nH_{2n}O$  is general formula of:

- |                                    |  |
|------------------------------------|--|
| <input type="checkbox"/> A Ether   | <input type="checkbox"/> B Carboxylic acid |
| <input type="checkbox"/> C Ketones | <input type="checkbox"/> D Carbolic acid   |

**Q142** Catalytic reduction of aldehyde and ketone forms:

- |                                    |  |
|------------------------------------|--|
| <input type="checkbox"/> A Alcohol | <input type="checkbox"/> B Carboxylic acid |
| <input type="checkbox"/> C Alkane  | <input type="checkbox"/> D Aldehyde        |

**Q143** Reacts with carboxylic acid to form ester:

- |                                     |   |
|-------------------------------------|---|
| <input type="checkbox"/> A Aldehyde | <input type="checkbox"/> B Alkyl Halide |
| <input type="checkbox"/> C Ketones  | <input type="checkbox"/> D Alcohol      |

**Q144** Hydrolysis of nitriles produces:

- |  |                                      |
|--|--------------------------------------|
| <input type="checkbox"/> A Carboxylic acid | <input type="checkbox"/> B Aldehydes |
| <input type="checkbox"/> C Ketones         | <input type="checkbox"/> D Esters    |

**Q145** Mass of sulphur in 24.5g of  $H_2SO_4$ :

- |                                 |                                 |
|---------------------------------|---------------------------------|
| <input type="checkbox"/> A 32 g | <input type="checkbox"/> B 24 g |
| <input type="checkbox"/> C 16 g | <input type="checkbox"/> D 8 g  |

**Q146** Moles of  $NH_3$  from 2.5 moles  $N_2$  ( $N_2 + 3H_2 \rightarrow 2NH_3$ ):

- |                                      |                                      |
|--------------------------------------|--------------------------------------|
| <input type="checkbox"/> A 2.5 moles | <input type="checkbox"/> B 2 moles   |
| <input type="checkbox"/> C 5 moles   | <input type="checkbox"/> D 7.5 moles |

**Q147** Quantum energy directly proportional to:

- |                                      |                                       |
|--------------------------------------|---------------------------------------|
| <input type="checkbox"/> A Photon    | <input type="checkbox"/> B Wavelength |
| <input type="checkbox"/> C Frequency | <input type="checkbox"/> D Velocity   |

**Q148** For  $l=2$ , total values of magnetic quantum number:

- |                              |                               |
|------------------------------|-------------------------------|
| <input type="checkbox"/> A 3 | <input type="checkbox"/> B 5  |
| <input type="checkbox"/> C 7 | <input type="checkbox"/> D 10 |

**Q149 Total directions of f-orbitals in space:**

- A 5  B 3  
 C 7  D 6

**Q150 NOT obtained from Schrödinger wave equation:**

- A Principal QN  B Spin QN  
 C Azimuthal QN  D Magnetic QN

**Q151 Degenerate orbitals explained by:**

- A Aufbau Principle  B n+l Rule  
 C Hund's Rule  D Pauli Exclusion

**Q152 Molecules in gases in constant movement — called:**

- A Kinetic theory of gases  B Crystal field theory  
 C Molecular orbital theory  D Transition state theory

**Q153 SI unit of pressure:**

- A mm of Hg  B Pascal  
 C Bar  D Torr

**Q154 Both temperature and volume doubled — pressure:**

- A Cannot be predicted  B Reduced to  $\frac{1}{2}$   
 C Remains unchanged  D Is doubled

**COMPLETE ANSWER KEY WITH DETAILED EXPLANATIONS**

**SECTION 1 — PHYSICS (Q.1-Q.40)**

**Q1. In isochoric process:**

**Correct Answer: C. Volume is kept constant**

Isochoric = constant volume ( $\Delta V=0$ ). No work done ( $W=0$ ). All heat transfer changes internal energy only.

**Q2. If 42J heat is transferred to system during expansion and work done is 32J, change in internal energy is:**

**Correct Answer: B. 10 J**

$\Delta U = Q - W = 42 - 32 = 10$  J. First Law of Thermodynamics.

**Q3. The 1st law of thermodynamics is generalization of law of conservation of:**

**Correct Answer: C. Energy**

First Law ( $\Delta U = Q - W$ ) is based on conservation of energy. Energy cannot be created or destroyed.

**Q4. RC = Resistance  $\times$  Capacitance is known as:**

**Correct Answer: B. Time constant**

RC = time constant ( $\tau$ ). Time for capacitor to charge to 63.2% or discharge to 36.8%.

**Q5. In parallel combination of two capacitors, equivalent capacitance equals:**

**Correct Answer: A.  $C_1 + C_2$**

Parallel:  $C_{eq} = C_1 + C_2$ . Series:  $1/C_{eq} = 1/C_1 + 1/C_2$ .

**Q6. The S.I unit of capacitance is:**

**Correct Answer: C. Farad**

Farad (F) = SI unit of capacitance.  $1 \text{ F} = 1 \text{ C/V}$ . Named after Michael Faraday.

**Q7. 1 kWh =**

**Correct Answer: C.  $3.6 \times 10^6$  J**

$1 \text{ kWh} = 1000 \text{ W} \times 3600 \text{ s} = 3.6 \times 10^6$  J. Commercial electricity unit.

**Q8. Volt  $\times$  Ampere is the unit of:**

**Correct Answer: D. Power**

$V \times A = \text{Watt} = \text{Power}$ .  $P = VI$ .

**Q9. The time rate of change of velocity is called:**

**Correct Answer: B. Acceleration**

Acceleration  $a = \Delta v/\Delta t$ . SI unit:  $\text{m/s}^2$ .

**Q10. In projectile motion, range will be maximum at angle:**

**Correct Answer: B. 45 degrees**

$R = v^2 \sin 2\theta/g$ . Maximum when  $\theta = 45^\circ$ .

**Q11. Which is NOT TRUE about momentum?**

**Correct Answer: C. Momentum is NOT a vector quantity**

Momentum IS a vector quantity ( $p = mv$ ). Direction matters.

**Q12. In perfect elastic collision:**

**Correct Answer: D. Momentum, KE and total energy all conserved**

Elastic collision: both momentum AND kinetic energy conserved.

**Q13. Slope of a displacement-time graph is:**

**Correct Answer: A. Velocity**

Slope of s-t graph =  $\Delta s/\Delta t$  = velocity.

**Q14. Two stones 10kg and 50kg fall from 100m cliff. Which has greater velocity at bottom?**

**Correct Answer: C. Both have same velocity**

$v = \sqrt{2gh}$ . Independent of mass — both reach same velocity = 44.7 m/s.

**Q15. Work done by gravity on 10N stone falling 250m:**

**Correct Answer: C. 2,500 J**

$W = F \times h = 10N \times 250m = 2,500 J$ .

**Q16. Speed halved — kinetic energy decreases by factor:**

**Correct Answer: B. 1/4**

$KE = \frac{1}{2}mv^2$ . If  $v \rightarrow v/2$ :  $KE_{new} = \frac{1}{2}m(v/2)^2 = KE/4$ .

**Q17. Earth contracts to half size — gravitational PE becomes:**

**Correct Answer: A. Double**

$U = -GMm/r$ . If  $r \rightarrow r/2$ : magnitude doubles.

**Q18. Product of force and velocity is:**

**Correct Answer: C. Power**

$P = F \cdot v$ . Power = force  $\times$  velocity.

**Q19. One degree is equal to:**

**Correct Answer: C. 0.0175 radian**

$1^\circ = \pi/180 \approx 0.0175 \text{ rad}$ .

**Q20. Object on circular path  $r=1m$  covers 2m arc. Angular displacement:**

**Correct Answer: B. 2 rad**

$\theta = s/r = 2/1 = 2 \text{ rad}$ .

**Q21. Speed and radius both doubled — centripetal force becomes:**

**Correct Answer: B. Double**

$F_c = mv^2/r$ . New =  $m(2v)^2/(2r) = 2mv^2/r = 2F_c$ . Doubles.

**Q22. Relation between angular and linear velocity:**

**Correct Answer: B.  $v = r\omega$**

$v = r\omega$ . Linear velocity = radius  $\times$  angular velocity.

**Q23. 100 waves per second, wavelength 1cm — wave speed:**

**Correct Answer: A.  $1 \text{ ms}^{-1}$**

$$v = f\lambda = 100 \times 0.01 = 1 \text{ m/s.}$$

**Q24. To make spring oscillation frequency 4 times, reduce mass to:**

**Correct Answer: C. One sixteenth**

$$f \propto 1/\sqrt{m}. \text{ For } f \rightarrow 4f: m \rightarrow m/16.$$

**Q25. Number of wavelengths per unit time is:**

**Correct Answer: D. Frequency**

Frequency = complete waves per second.

**Q26. Speed of sound  $332 \text{ ms}^{-1}$  at  $0^\circ\text{C}$ . Value at  $10^\circ\text{C}$ :**

**Correct Answer: B.  $338.1 \text{ ms}^{-1}$**

$$v = 332 + 0.61 \times 10 = 338.1 \text{ ms}^{-1}.$$

**Q27.  $C_p - C_v = R$  shows that:**

**Correct Answer: C.  $C_p > C_v$**

$$C_p - C_v = R > 0, \text{ therefore } C_p > C_v.$$

**Q28. Thermodynamic process with constant volume:**

**Correct Answer: C. Isochoric**

Isochoric = constant volume. No work done.

**Q29.  $2\mu\text{F}$  and  $6\mu\text{F}$  capacitors in parallel — equivalent capacitance:**

**Correct Answer: A.  $8\mu\text{F}$**

$$\text{Parallel: } C_{eq} = 2 + 6 = 8\mu\text{F.}$$

**Q30. Capacitance of a capacitor does NOT depend upon:**

**Correct Answer: A. Temperature**

$$C = \epsilon A/d. \text{ Independent of temperature.}$$

**Q31. Power transfer will be maximum when:**

**Correct Answer: C.  $R = r$**

Maximum power transfer: external  $R =$  internal resistance  $r$ .

**Q32. Wire radius halved — resistance becomes:**

**Correct Answer: D.  $16R$**

$$\text{Volume conserved} \rightarrow L' = 4L, A' = A/4. R' = 16R.$$

**Q33. Charged particle enters magnetic field parallel — it will:**

**Correct Answer: C. Move straight**

$$F = qv \times B = 0 \text{ when } v \text{ parallel to } B. \text{ Moves straight.}$$

**Q34. Magnetic flux is maximum when angle between field and area vector is:**

**Correct Answer: A.  $0^\circ$**

$$\Phi = BA \cos\theta. \text{ Max at } \theta = 0^\circ.$$

**Q35. Pakistan domestic electricity supply has frequency:**

**Correct Answer: B. 50 Hz**

Pakistan uses 50 Hz AC (same as most of Asia and Europe).

**Q36. Device that increases or decreases EMF is called:**

**Correct Answer: C. Transformer**

Transformer steps up or steps down AC voltage via mutual induction.

**Q37. Induced current opposes the cause that produces it. This is:**

**Correct Answer: C. Lenz's Law**

Lenz's Law: conservation of energy — induced current opposes change.

**Q38. The half-life of a radioactive substance is 20 minutes. After 1 hour, fraction remaining is:**

**Correct Answer: C. 1/8**

1 hour = 3 half-lives. Fraction =  $(1/2)^3 = 1/8$ .

**Q39. Which of following has maximum penetrating power?**

**Correct Answer: C. Gamma rays**

Gamma rays have maximum penetrating power — can pass through several cm of lead.

**Q40. The escape velocity from earth's surface is approximately:**

**Correct Answer: B. 11.2 km/s**

Escape velocity =  $\sqrt{2gR} = \sqrt{2 \times 9.8 \times 6.4 \times 10^6} \approx 11.2$  km/s.

## SECTION 2 — BIOLOGY (Q.41-Q.95)

**Q41. If fertilization occurs, young embryo is implanted into:**

**Correct Answer: D. Endometrium**

Embryo implants into endometrium (inner uterine lining) around day 6-10 after fertilization.

**Q42. Sperms are produced in:**

**Correct Answer: D. Seminiferous tubules**

Spermatogenesis occurs in seminiferous tubules. Sperm mature in epididymis.

**Q43. Gonadotropins are released by which gland?**

**Correct Answer: C. Pituitary**

FSH and LH (gonadotropins) released by anterior pituitary gland.

**Q44. Found at ends of long bones, nose, larynx and trachea:**

**Correct Answer: D. Hyaline cartilage**

Hyaline cartilage: articular surfaces, tracheal rings, nose, larynx.

**Q45. Muscle with spontaneous contraction, many nuclei and no control over contraction:**

**Correct Answer: B. Cardiac muscle**

Cardiac muscle: involuntary, branched, intercalated discs, autorhythmic.

**Q46. Ball and Socket joint is present at:**

**Correct Answer: A. Shoulder**

Shoulder (and hip) = ball and socket joints. Allow movement in all directions.

**Q47. Na<sup>+</sup> ions are nearly \_\_\_\_\_ times greater outside cell than inside:**

**Correct Answer: A. 10**

[Na<sup>+</sup>] outside ~145 mEq/L, inside ~15 mEq/L = ~10× gradient.

**Q48. Which hormone induces labour pains?**

**Correct Answer: B. Oxytocin**

Oxytocin from posterior pituitary stimulates uterine contractions.

**Q49. Hormone secreted due to decreased water content of blood:**

**Correct Answer: A. ADH**

ADH released when blood osmolarity rises → kidneys reabsorb water.

**Q50. Place of production of neurotransmitters:**

**Correct Answer: B. Presynaptic neuron**

Neurotransmitters synthesized in presynaptic neuron terminals.

**Q51. Endorphins are produced in:**

**Correct Answer: A. Brain**

Endorphins produced in hypothalamus and pituitary gland.

**Q52. Hormone responsible for sperm production and male secondary sexual characteristics:**

**Correct Answer: C. Testosterone**

Testosterone from Leydig cells drives spermatogenesis and secondary characteristics.

**Q53. Leydig cells are responsible for:**

**Correct Answer: A. Testosterone production**

Leydig (interstitial) cells produce testosterone under LH stimulation.

**Q54. Estrogen secretion during oogenesis is stimulated by:**

**Correct Answer: C. FSH**

FSH stimulates follicle development and estrogen secretion from granulosa cells.

**Q55. Pituitary hormones regulating menstrual cycle:**

**Correct Answer: C. FSH and LH**

FSH and LH from anterior pituitary regulate the full menstrual cycle.

**Q56. Trait transmitted from affected father to only his son:**

**Correct Answer: C. Y-linked**

Y-linked (holandric) traits: father → ALL sons via Y chromosome.

**Q57. When both alleles of a gene pair are same, organism is:**

**Correct Answer: C. Homozygous**

Homozygous = identical alleles (AA or aa).

**Q58. Similar in function but different in structure — organs called:**

**Correct Answer: A. Analogous organs**

Analogous = same function, different evolutionary origin. Convergent evolution.

**Q59. NOT a mode of action of an antibody:**

**Correct Answer: C. Secretion of cytokines**

Cytokines secreted by T-cells/macrophages, NOT antibodies.

**Q60. Pepsinogen is converted into active pepsin by:**

**Correct Answer: D. Hydrochloric acid**

HCl from parietal cells converts pepsinogen → active pepsin.

**Q61. Which human body function is NOT controlled through negative feedback?**

**Correct Answer: C. Labor contraction**

Labor uses positive feedback (oxytocin cycle). Others use negative feedback.

**Q62. Grey matter of spinal cord does NOT contain:**

**Correct Answer: C. Axons of interneurons**

Axons are in white matter. Grey matter contains cell bodies only.

**Q63. Maximum temperature in enzyme action — enzymes:**

**Correct Answer: A. Start to denature**

Maximum temperature = denaturation threshold. Activity drops sharply.

**Q64. Feedback inhibition — enzyme inhibited by:**

**Correct Answer: A. Product being produced**

Feedback inhibition: end product inhibits first enzyme of pathway.

**Q65. Chemical that regulates enzymatic activity:**

**Correct Answer: B. Inhibitor**

Inhibitors regulate enzyme activity by slowing or stopping reactions.

**Q66. Above optimum temperature, enzymatic activity decreases due to:**

**Correct Answer: C. Denaturation**

High heat breaks weak bonds → enzyme denatures → inactive.

**Q67. NOT part of Darwin's theory of natural selection:**

**Correct Answer: B. Variation arises by gene mutation**

Darwin didn't know about genes — Mendel's genetics integrated later in Modern Synthesis.

**Q68. Kiwi evolution, horse food, duck webbed feet — explained by:**

**Correct Answer: A. Lamarck**

Lamarck explained these vestigial and acquired characteristic examples in detail.

**Q69. NOT TRUE about interferons:**

**Correct Answer: D. Secrete interleukin**

Interferons are cytokines but don't secrete interleukins — separate category.

**Q70. Intrinsic factor from parietal cells helps in:**

**Correct Answer: A. Vitamin B12 absorption**

Intrinsic factor binds vitamin B12, enabling its absorption in ileum.

**Q71. Major gastric juice production triggered by:**

**Correct Answer: C. Protein food in stomach**

Gastric phase (food in stomach) = ~70% of gastric juice produced.

**Q72. NOT a metabolic role of liver:**

**Correct Answer: D. Immunoglobulin synthesis**

Immunoglobulins made by plasma B-cells, not liver.

**Q73. Enzyme NOT produced by pancreas:**

**Correct Answer: C. Pepsin**

Pepsin made by chief cells of stomach. Pancreas: lipase, trypsinogen, amylase.

**Q74. Heart chamber from where aorta originates:**

**Correct Answer: A. Left ventricle**

Aorta originates from LEFT VENTRICLE. Pulmonary artery from right ventricle.

**Q75. Lymphatic system does NOT include:**

**Correct Answer: D. Lungs**

Lungs = respiratory system. Not part of lymphatic system.

**Q76. Protein in walls of alveoli:**

**Correct Answer: A. Collagen**

Collagen and elastin form alveolar walls — structural support and elasticity.

**Q77. Natural bacterial flora beneficial because they:**

**Correct Answer: A. Interfere with pathogenic colonization**

Normal flora competes with pathogens for nutrients and attachment sites.

**Q78. Bacteria resistance against heat provided by:**

**Correct Answer: C. Spores**

Bacterial endospores resist extreme heat including boiling.

**Q79. Cells most important for immunity:**

**Correct Answer: C. Lymphocytes**

Lymphocytes (B-cells and T-cells) = primary immune cells.

**Q80. Digestion of which food starts from oral cavity?**

**Correct Answer: C. Carbohydrates**

Salivary amylase begins carbohydrate digestion in the mouth.

**Q81. Vaccination is example of:**

**Correct Answer: C. Acquired/Artificial active immunity**

Vaccination = artificial active immunity — body makes antibodies to introduced antigen.

**Q82. Pubic symphysis and intervertebral disc are examples of:**

**Correct Answer: C. Cartilaginous joints**

Cartilaginous joints: slightly movable, joined by fibrocartilage.

**Q83. Cartilage harder to heal than bone because it:**

**Correct Answer: A. Lacks vascular supply**

Cartilage is avascular — no blood vessels for repair supply.

**Q84. Feature absent from cardiac muscles:**

**Correct Answer: B. Multinucleate cells**

Cardiac muscle cells are UNINUCLEATE. Skeletal muscle is multinucleate.

**Q85. Sarcoplasmic reticulum mainly responsible for:**

**Correct Answer: A. Calcium storage**

SR stores and releases  $Ca^{2+}$  which triggers muscle contraction.

**Q86. Junction between two neurons:**

**Correct Answer: B. Synapse**

Synapse = junction between two neurons.

**Q87. Chemically a steroid hormone:**

**Correct Answer: C. Cortisone**

Cortisone is derived from cholesterol — a steroid hormone.

**Q88. Parathyroid underactivity causes drop in blood:**

**Correct Answer: D.  $Ca^{2+}$**

PTH raises blood  $Ca^{2+}$ . Underactivity → hypocalcemia.

**Q89. Protein establishing matrix of bone and cartilage:**

**Correct Answer: C. Collagen**

Collagen Type I = bone; Type II = cartilage matrix.

**Q90. Non-competitive inhibitors react at:**

**Correct Answer: A. Allosteric site**

Non-competitive inhibitors bind allosteric site → change enzyme shape.

**Q91. Most enzymes work best at temperature:**

**Correct Answer: B. 40°C**

Human enzymes optimal at ~37–40°C.

**Q92. Competitive inhibitors block substrate because they have:**

**Correct Answer: A. Similar shape to substrate**

Competitive inhibitors mimic substrate shape and compete for active site.

**Q93. When light falls on P-700, it is:**

**Correct Answer: D. Oxidised**

P-700 (PSI) absorbs light → oxidized, loses electron to NADP<sup>+</sup>.

**Q94. Products of light reaction used in dark reaction:**

**Correct Answer: D. ATP and NADPH**

ATP and NADPH from light reactions used in Calvin cycle.

**Q95. End products of light reactions of photosynthesis:**

**Correct Answer: A. ATP and NADPH**

Light reactions produce: ATP, NADPH, and O<sub>2</sub>.

**Q96. Smallest known bacteria belong to genus:**

**Correct Answer: A. Mycoplasma**

Mycoplasma (0.2–0.3 μm) = smallest bacteria. No cell wall.

**Q97. Tonoplast is membrane separating:**

**Correct Answer: D. Vacuole and Cytoplasm**

Tonoplast = membrane surrounding central vacuole.

### SECTION 3 — ENGLISH (Q.96-Q.112)

**Q98. I \_\_\_\_\_ English for five years.**

**Correct Answer: C. Have been studying**

Present Perfect Continuous: action started in past, continues to present. 'For five years' = duration.

**Q99. The soup \_\_\_\_\_ good.**

**Correct Answer: B. Tastes**

Stative verb 'taste' → simple present. Singular subject → 'tastes'.

**Q100. Unless we \_\_\_\_\_ now, we cannot be on time.**

**Correct Answer: C. Do not start**

'Unless' = 'if not'. 'Unless we do not start' is correct conditional.

**Q101. Daud is better than \_\_\_\_\_ of the college.**

**Correct Answer: C. All other teachers**

'Better than all other teachers' — need 'other' since Daud is included in 'all teachers'.

**Q102. Abide \_\_\_\_\_ the traffic laws for smooth and safe flow of traffic.**

**Correct Answer: C. By**

'Abide by' = comply with/follow rules. Fixed phrasal verb.

**Q103. He prefers death \_\_\_\_\_ dishonor.**

**Correct Answer: D. To**

'Prefer...to' is correct construction in formal English.

**Q104. What does the word 'SURPLUS' mean?**

**Correct Answer: A. In excess**

Surplus = excess amount left over when requirements are met.

**Q105. What does the word 'SPILL' mean?**

**Correct Answer: D. Spread**

Spill = to cause liquid to flow over edge; to spread out.

**Q106. What does the word 'CURIOUS' mean?**

**Correct Answer: A. Keen**

Curious = eager to know or learn. Synonyms: inquisitive, keen.

**Q107. Pick the sentence with correct punctuation:**

**Correct Answer: D. He had one motto: serving humanity.**

Colon (:) introduces explanations or examples. 'One motto: serving humanity' correct.

**Q108. Pick the word with correct spelling:**

**Correct Answer: B. Colleague**

Colleague = col + league. A person one works with professionally.

**Q109. Pick the word with correct spelling:**

**Correct Answer: A. Acquaintance**

Acquaintance — contains 'cqu'. Person known slightly.

**Q110. Pick the word with correct spelling:**

**Correct Answer: D. Priority**

Priority — correct spelling with -ior-.

**Q111. Pick the sentence with correct punctuation:**

**Correct Answer: D. He did his best; that was all anyone could do.**

Semicolon separates two independent clauses correctly.

**Q112. Pick the correct option:**

**Correct Answer: B. How has the leg of the chair broken?**

'How has the leg of the chair broken?' — correct auxiliary verb placement.

**Q113. The teacher asked the students \_\_\_\_\_ they had completed their homework.**

**Correct Answer: B. whether**

Indirect question with 'asked' uses 'whether' or 'if'. 'Whether' is more formal.

**Q114. Neither the students nor the teacher \_\_\_\_\_ present today.**

**Correct Answer: C. was**

Neither...nor: verb agrees with subject nearest to verb. 'Teacher' is singular → 'was'.

#### **SECTION 4 — CHEMISTRY (Q.113-Q.152)**

**Q115. Vapor pressure is independent of:**

**Correct Answer: D. Surface area of liquid**

Vapor pressure depends on T and intermolecular forces, NOT surface area.

**Q116. Boiling point of ether less than alcohols due to:**

**Correct Answer: B. Intermolecular forces**

Ethers: no H-bonding with itself → weaker forces → lower boiling point.

**Q117. Ice cubes unite when pressed due to:**

**Correct Answer: D. H-bonding**

Pressure melts ice, then H-bonds reform when pressure removed → cubes unite.

**Q118. NaCl crystal: each Na<sup>+</sup> surrounded by:**

**Correct Answer: A. 6 Cl<sup>-</sup> and each Cl<sup>-</sup> by 6 Na<sup>+</sup>**

NaCl: each Na<sup>+</sup> by 6 Cl<sup>-</sup>; each Cl<sup>-</sup> by 6 Na<sup>+</sup>. Coordination number = 6.

**Q119. Greater lattice energy shown by:**

**Correct Answer: D. NaF**

NaF: F<sup>-</sup> smallest halide → strongest attraction → highest lattice energy.

**Q120. Thermal conductivity of metals due to:**

**Correct Answer: B. Freely moving electrons**

Free/delocalized electrons carry thermal energy rapidly through metal lattice.

**Q121. 200 atm pressure in Haber's process used for:**

**Correct Answer: A. Better yield**

High pressure favors product side ( $N_2 + 3H_2 \rightarrow 2NH_3$  fewer moles) → better yield.

**Q122. Equilibrium attained earlier by using:**

**Correct Answer: D. Catalyst**

Catalyst lowers  $E_a$  → speeds both reactions → equilibrium reached faster.

**Q123. Temperature raised 10K — reaction rate increases to:**

**Correct Answer: A. Double**

Rate approximately doubles per 10°C rise — standard kinetics rule.

**Q124. Minimum energy for effective collisions:**

**Correct Answer: A. Activation energy**

Activation energy ( $E_a$ ) = minimum energy required for reaction to occur.

**Q125. Which is NOT a state function?**

**Correct Answer: B. Work (W)**

Work (W) is path-dependent. P, V, T are state functions.

**Q126.  $Mg^{2+}(g) + O^{2-}(g) \rightarrow MgO(s)$  represents:**

**Correct Answer: C. Lattice energy**

Gaseous ions → solid ionic lattice = lattice energy (exothermic).

**Q127. When nitric oxide reacts with ozone, order of reaction is:**

**Correct Answer: A. 2nd**

Rate =  $k[\text{NO}][\text{O}_3]$ . First order each, overall 2nd order.

**Q128. During electrolysis, reduction always occurs at:**

**Correct Answer: B. Cathode**

RED CAT: Reduction at Cathode. AN OX: Anode = Oxidation.

**Q129. Highest electronegativity of Fluorine due to:**

**Correct Answer: D. Smaller size and higher nuclear charge**

Fluorine: smallest radius + highest nuclear charge in period → strongest electron pull.

**Q130. VSEPR theory explains:**

**Correct Answer: D. Shapes**

VSEPR predicts molecular shapes by minimizing electron pair repulsions.

**Q131.  $sp^3$  hybridization is shown by:**

**Correct Answer: D.  $\text{CH}_4$**

$\text{CH}_4$ : carbon 4 single bonds →  $sp^3$ . Tetrahedral geometry,  $109.5^\circ$ .

**Q132. Factor NOT affecting bond length:**

**Correct Answer: D. Ionization energies of bonded atoms**

Ionization energy doesn't directly affect bond length.

**Q133. Malleable and ductile substance:**

**Correct Answer: D. Aluminum**

Aluminum = metal → malleable and ductile. Ionic compounds are brittle.

**Q134. Coordination number of Na in metallic BCC structure:**

**Correct Answer: C. 8**

BCC metallic Na: each atom touches 8 neighbors. Coordination number = 8.

**Q135. Cracking method for better quality gasoline:**

**Correct Answer: B. Catalytic**

Catalytic cracking (zeolite) produces higher octane gasoline.

**Q136. Homocyclic organic compounds divided into:**

**Correct Answer: A. Alicyclic and Aromatic**

Homocyclic: only C in ring. Two types: Alicyclic and Aromatic.

**Q137. Acetophenone formed from benzene by:**

**Correct Answer: B. Acylation**

Friedel-Crafts acylation:  $\text{C}_6\text{H}_6 + \text{CH}_3\text{COCl} \rightarrow \text{C}_6\text{H}_5\text{COCH}_3$ .

**Q138. Generic formula of cycloalkane is:**

**Correct Answer: B.  $\text{C}_n\text{H}_{2n}$**

Cycloalkanes:  $\text{C}_n\text{H}_{2n}$  (one degree of unsaturation from ring).

**Q139. Test that differentiates alcohol from phenol:**

**Correct Answer: A. Lucas test**

Lucas test reacts with alcohols but NOT phenols.

**Q140. Order of reactivity of alcohol when C-O bond breaks:**

**Correct Answer: A. Tertiary > secondary > Primary**

C-O cleavage:  $3^\circ > 2^\circ > 1^\circ$ . Tertiary carbocations most stable.

**Q141.  $C_nH_{2n}O$  is general formula of:**

**Correct Answer: C. Ketones**

Ketones and aldehydes:  $C_nH_{2n}O$ . Carboxylic acids:  $C_nH_{2n}O_2$ .

**Q142. Catalytic reduction of aldehyde and ketone forms:**

**Correct Answer: A. Alcohol**

$H_2/Ni$ : Aldehyde  $\rightarrow$  Primary alcohol; Ketone  $\rightarrow$  Secondary alcohol.

**Q143. Reacts with carboxylic acid to form ester:**

**Correct Answer: D. Alcohol**

$RCOOH + R'OH \rightarrow RCOOR' + H_2O$ . Fischer esterification.

**Q144. Hydrolysis of nitriles produces:**

**Correct Answer: A. Carboxylic acid**

$R-CN + 2H_2O \rightarrow R-COOH + NH_3$ .

**Q145. Mass of sulphur in 24.5g of  $H_2SO_4$ :**

**Correct Answer: D. 8 g**

Moles  $H_2SO_4 = 24.5/98 = 0.25$  mol. Mass S =  $0.25 \times 32 = 8g$ .

**Q146. Moles of  $NH_3$  from 2.5 moles  $N_2$  ( $N_2 + 3H_2 \rightarrow 2NH_3$ ):**

**Correct Answer: C. 5 moles**

1 mol  $N_2 \rightarrow 2$  mol  $NH_3$ . 2.5 mol  $N_2 \rightarrow 5$  mol  $NH_3$ .

**Q147. Quantum energy directly proportional to:**

**Correct Answer: C. Frequency**

$E = hf$  (Planck). Energy  $\propto$  frequency.

**Q148. For  $l=2$ , total values of magnetic quantum number:**

**Correct Answer: B. 5**

$m = -l$  to  $+l$ . For  $l=2$ :  $m = -2, -1, 0, 1, 2 \rightarrow 5$  values.

**Q149. Total directions of f-orbitals in space:**

**Correct Answer: C. 7**

f orbitals:  $l=3$ ,  $m = -3$  to  $+3 \rightarrow 7$  orientations.

**Q150. NOT obtained from Schrödinger wave equation:**

**Correct Answer: B. Spin QN**

Spin QN ( $m_s = \pm\frac{1}{2}$ ) introduced separately by Pauli. Not from Schrödinger.

**Q151. Degenerate orbitals explained by:**

**Correct Answer: C. Hund's Rule**

Hund's rule: fill degenerate orbitals singly with parallel spins before pairing.

**Q152. Molecules in gases in constant movement — called:**

**Correct Answer: A. Kinetic theory of gases**

Kinetic molecular theory: gas molecules in constant random motion.

**Q153. SI unit of pressure:**

**Correct Answer: B. Pascal**

Pascal (Pa) = SI unit. 1 Pa = 1 N/m<sup>2</sup>.

**Q154. Both temperature and volume doubled — pressure:**

**Correct Answer: C. Remains unchanged**

$PV/T = \text{const. } P_2 = P_1 \times (V/2V) \times (2T/T) = P_1$ . Unchanged.
